Epson **EB-1880**

4000 lm | XGA | 10 W

HDMI | 3-in-1 USB display
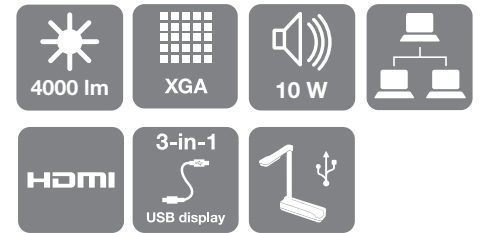

The Epson EB-1880 offers high brightness and helpful features at an affordable price point. Powered by 3LCD technology, it delivers a vibrant, high-quality XGA picture, thanks to an equally high White and Colour Light Output of 4,000 lumens and a contrast ratio of 2,500:1.

Setting up and using the EB-1880 couldn't be easier. The projector automatically searches for the video source, so users don't need to do anything after plugging in their laptops. Sound is provided by the built-in 10W speaker. And, with Epson's clever 3-in-1 USB display feature, one cable is all that's needed for audio, visuals and mouse control.

Aligning the picture takes just seconds – vertical keystone correction is automatic, while horizontal keystone can be adjusted using an intuitive slider.

The EB-1880 has just about every input a user could need, both now and in the future, including HDMI. It also has a direct connection for Epson's ELP-DC06 USB document camera.

Offering installation flexibility, the EB-1880 is light and compact. Although ideal for ceiling installation, it can also be used on desktops – low tables are no problem with the projector's extra-long adjustable foot.

For a low total cost of ownership, the projector has a low power consumption and a long lamp life. Remote network management helps keep maintenance costs down, as the lamp life and filter temperature can be monitored from a single point on the network to remove the need for physical checks.

KEY FEATURES

- Bright, vibrant picture with 4,000 lumens White and Colour Light Output
- High-quality XGA image with 2,500:1 contrast ratio
- Automatic video source detection
- Convenient built-in 10W speaker
- 3-in-1 USB display means just one cable for image, audio and mouse control
- Effortless picture alignment with automatic vertical keystone correction
